

p!nto Air

Japanese portable ergonomic cushion

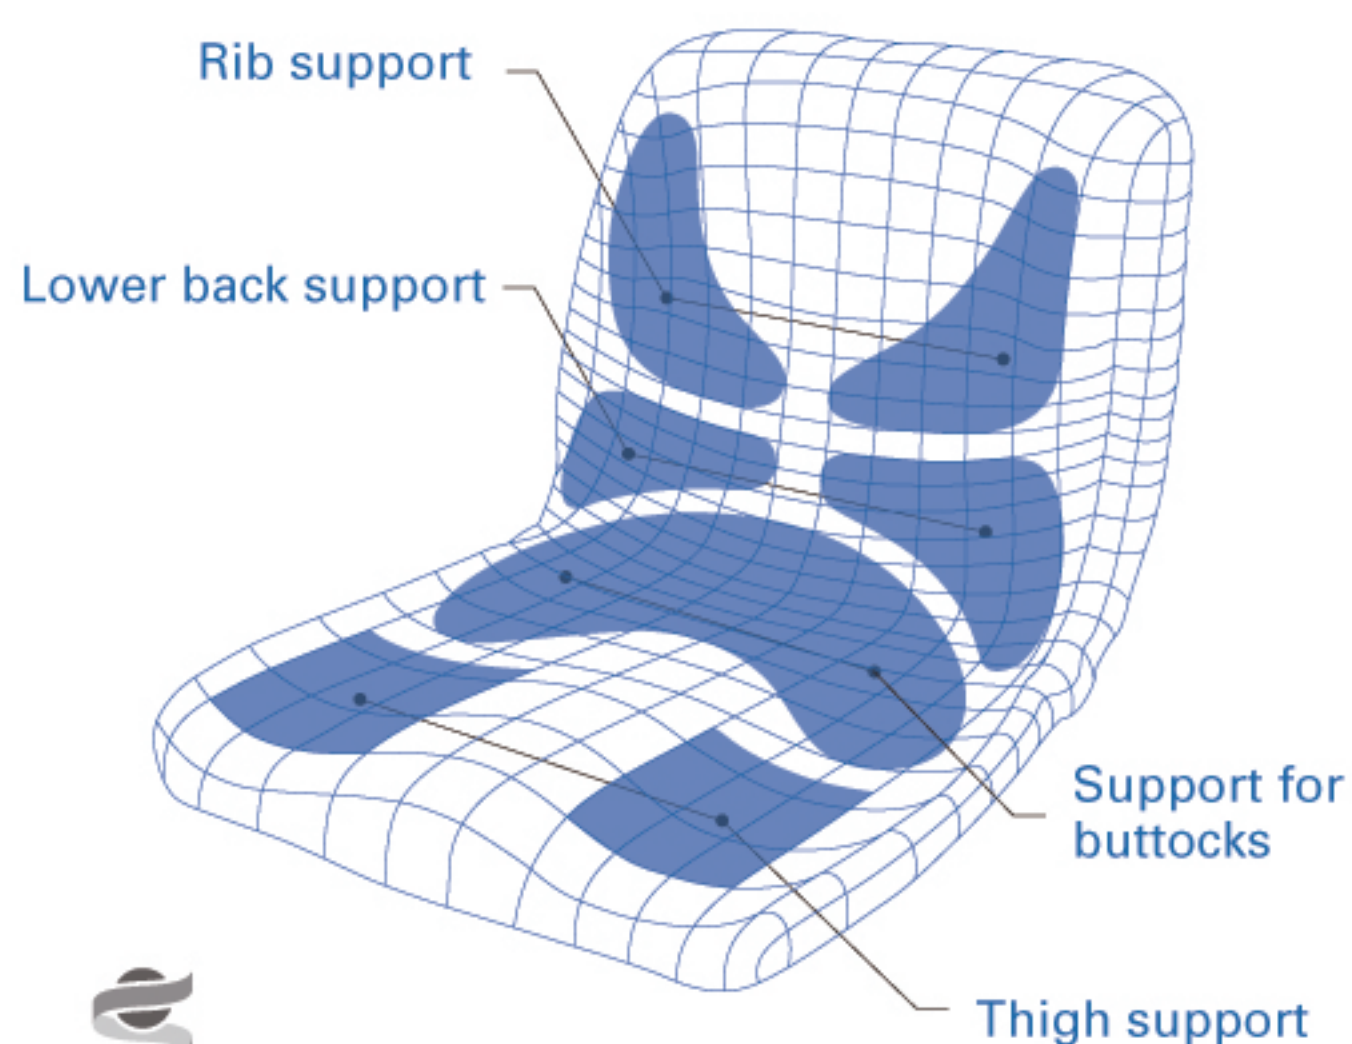

P!NTO AIR is a travel cushion so comfortable and thin that it seems filled with air.

P!NTO helps your active life in comfort, preventing the misalignment of your body. A technique born in Japan that provides effective support, although the cushion is thin and light. P!NTO air accompanies you both at work and traveling.

Designed in Japan, Production in Japan, Distribution from Italy.

4 ideal integrated supports

Just sitting on P!NTO allows the body to find its natural axis.

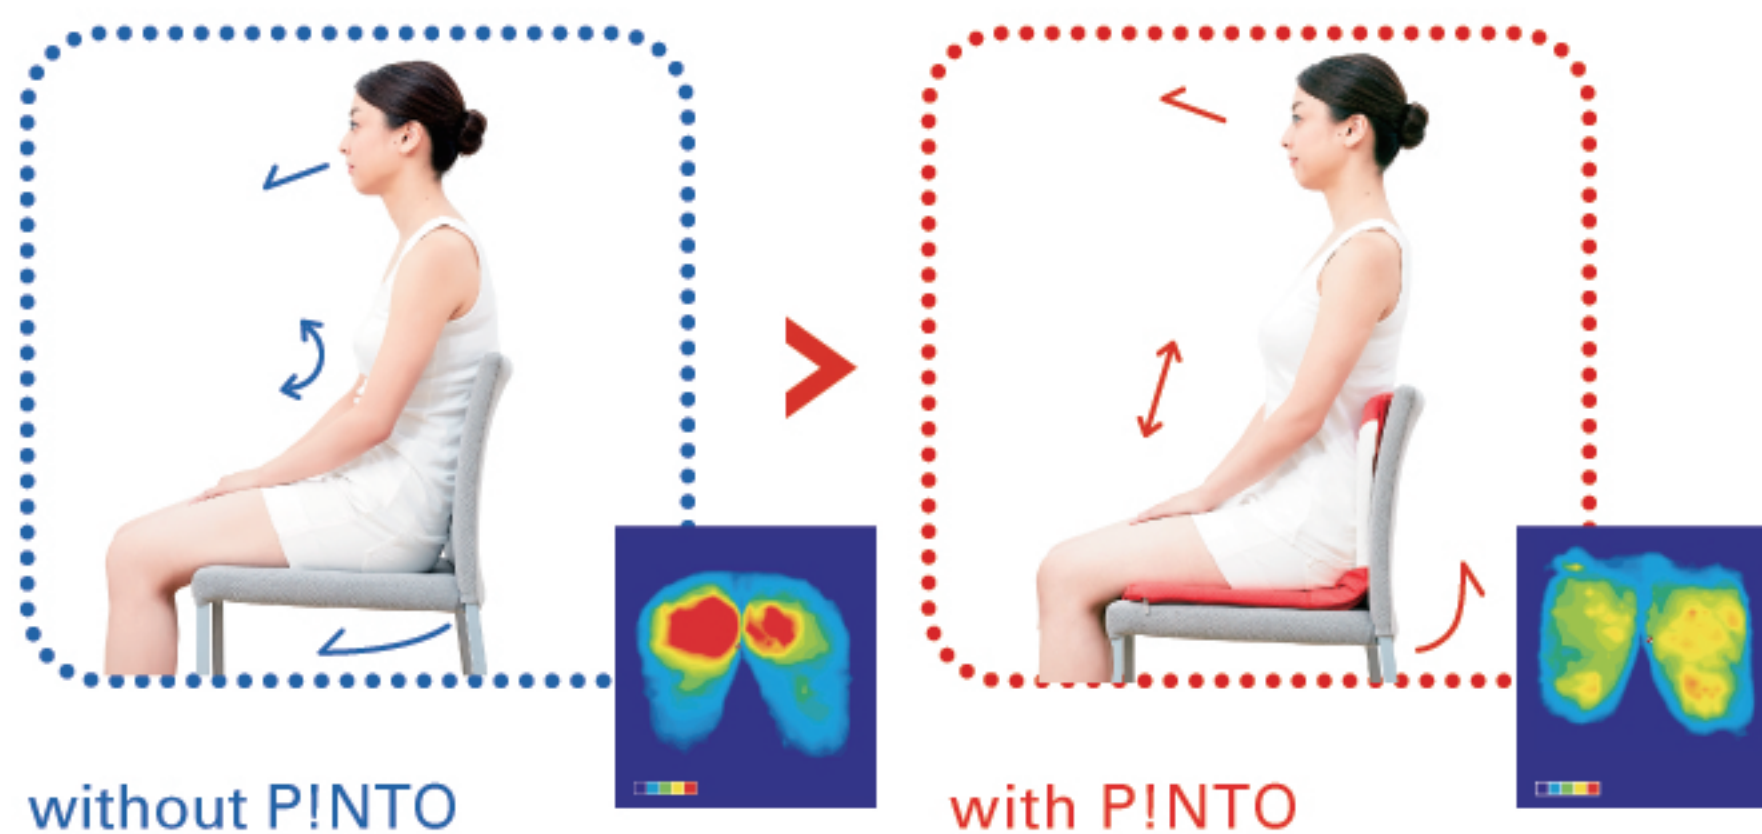

P!NTO offers good postural habits, as well as natural and balanced comfort.

After 180,000 sales in 5 years in Japan, users have asked for a P!NTO cushion that can be taken anywhere. It can be used on a seat with backrest. At work, at the café, on a park bench, in the car, the plane or the train.

Thanks to a layer of high resilience urethane, this cushion is resistant and the mass is distributed during the sitting, which allows a comfort even of long duration and this despite its fineness and its curves.

P!NTO is the only realization in the world with this Japanese technology. The cover consists of seven pieces sewn in relief to highlight this function and its curve.

Comparison of the zones of tension according to the posture

Technical characteristics:

Cushion: high resilience (HR) polyurethane foam

Bottom part of the cover: 100% polyester attached on polyurethane layer

Upper part of the cover: 95% elastic polyester, 5% polyurethane

Size, Weight: width 40cm x height 38cm x depth 38cm, 735g

Resistance: tested according to the JIS standard (Japanese Industrial Standard), thickness loss of only 4% after 80000 compressions

Maintenance: Cover can be removed and machine washed inside a protection net. The inner cushion does not require special maintenance.

Portable: it can be easily brought anywhere using the handle

Use: thanks to the anti slip finish of the bottom side the cushion stays firm even when you move
