**P!NTO Kids offers good postural habits for healthy development.**

Good posture starts with seating the right way. The P!NTO Kids cushion allows your child to adjust his body to its natural position, having a better concentration and balance of the body.

Designed in Japan, Production in Japan and Italy, Distribution from Italy.

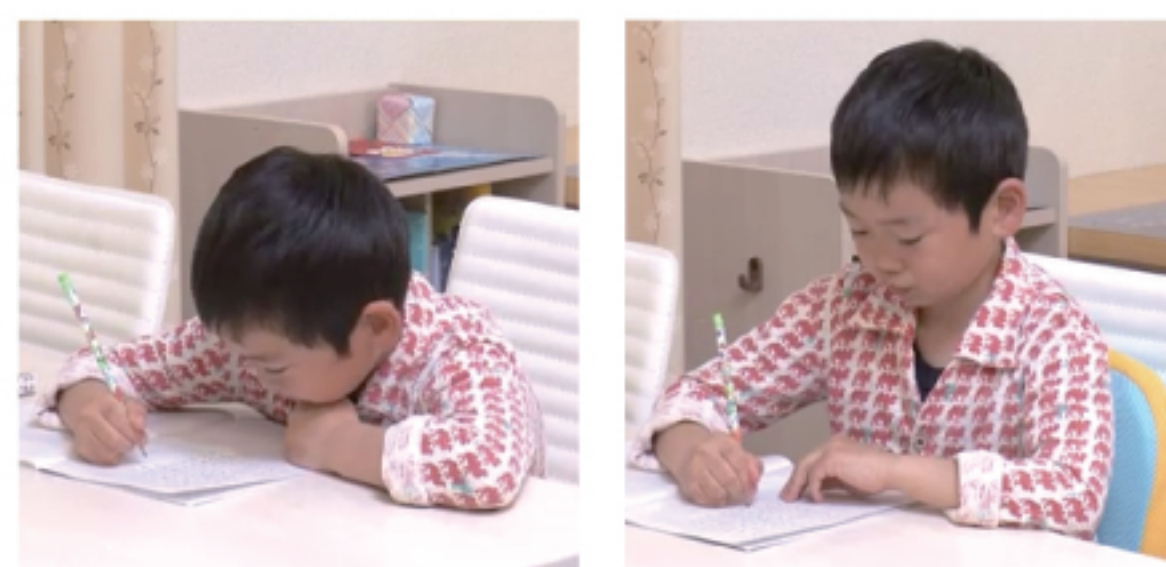

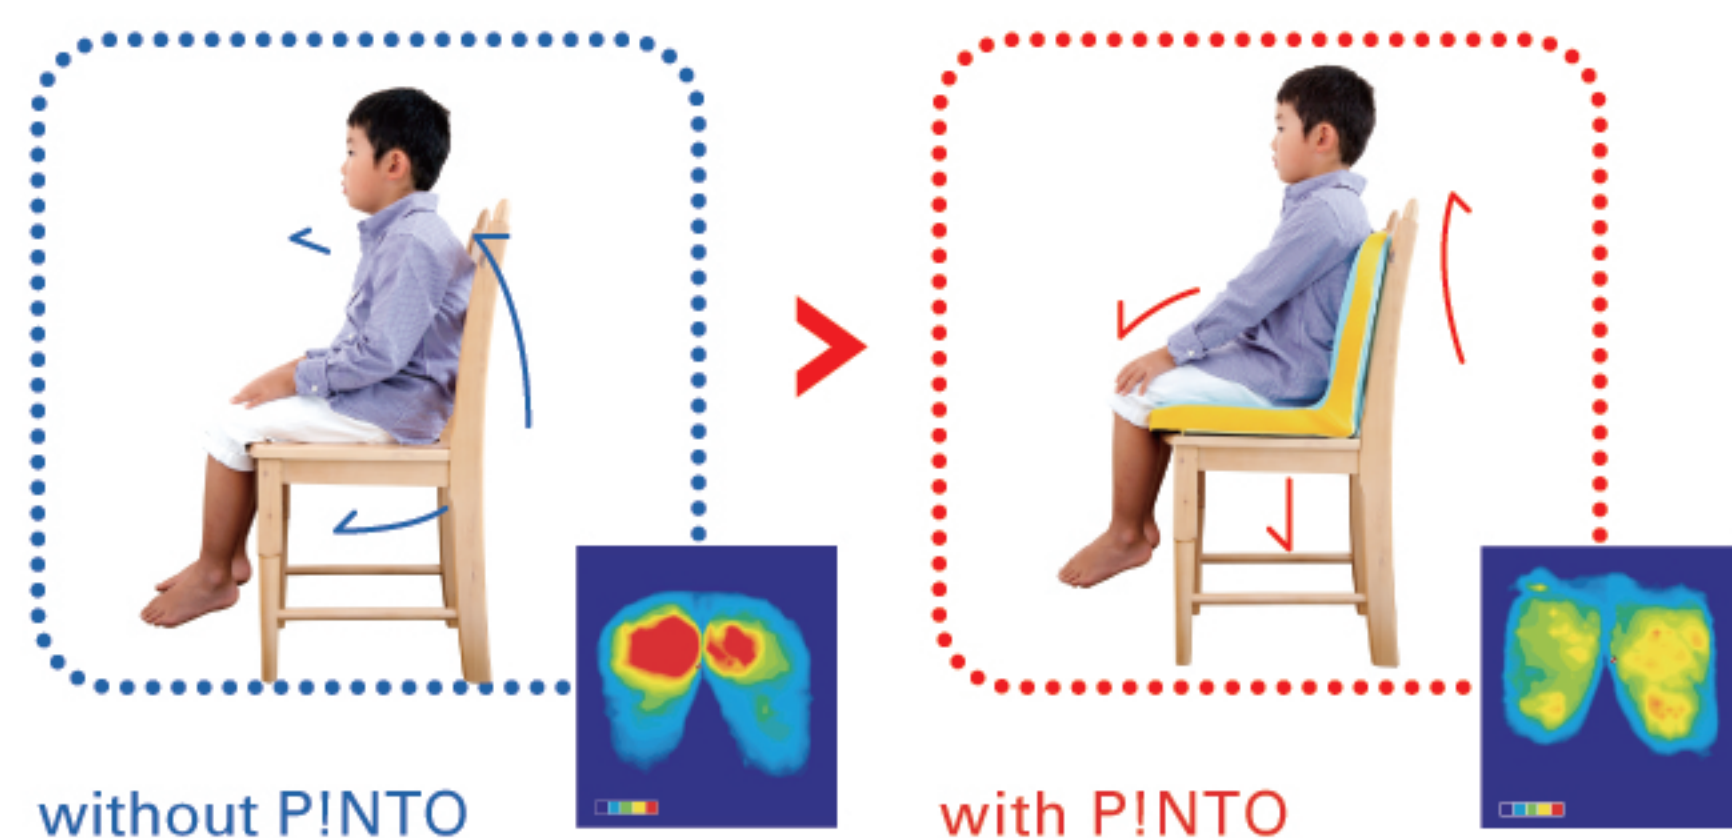

## 4 ideal integrated supports

It is important that children adopt a good posture for healthy development. Their bone structure and internal organs develops rapidly until the age of 12. Every day there are many activities during which they do not sit well: doing homework, watching television or during meals. This can cause poor concentration, vision problems and other tensions. It is important to realign their still soft bodies, but it is not easy once they catch a bad habit. With P!NTO Kids, just place it and sit down, the child's body takes the right reflexes. It is used in public schools in Japan.

Convenient for homework, in the dining room, on the sofa or even in the car. This cushion can be carried easily by folding in two.

### Comparison of the zones of tension according to the posture

### Technical characteristics:

Cushion Material: High Resilience HR Polyurethane Foam

Cover: 100% Polyester

Dimensions, Weight: width 38cm x height 38cm x depth 38cm, 800g

Resistance: tested according to the JIS standard (Japanese Industrial Standard), thickness loss of only 4% after 80000 compressions

Maintenance: Cover can be removed and machine washed inside a protection net. The inner cushion does not require special maintenance.

Portable: a light and foldable polyurethane cushion can be transported easily

Use: thanks to the anti slip finish of the bottom side the cushion stays firm even when you move
