Good posture starts with a good seating

Just sitting on P!NTO allows the body to find its natural axis.

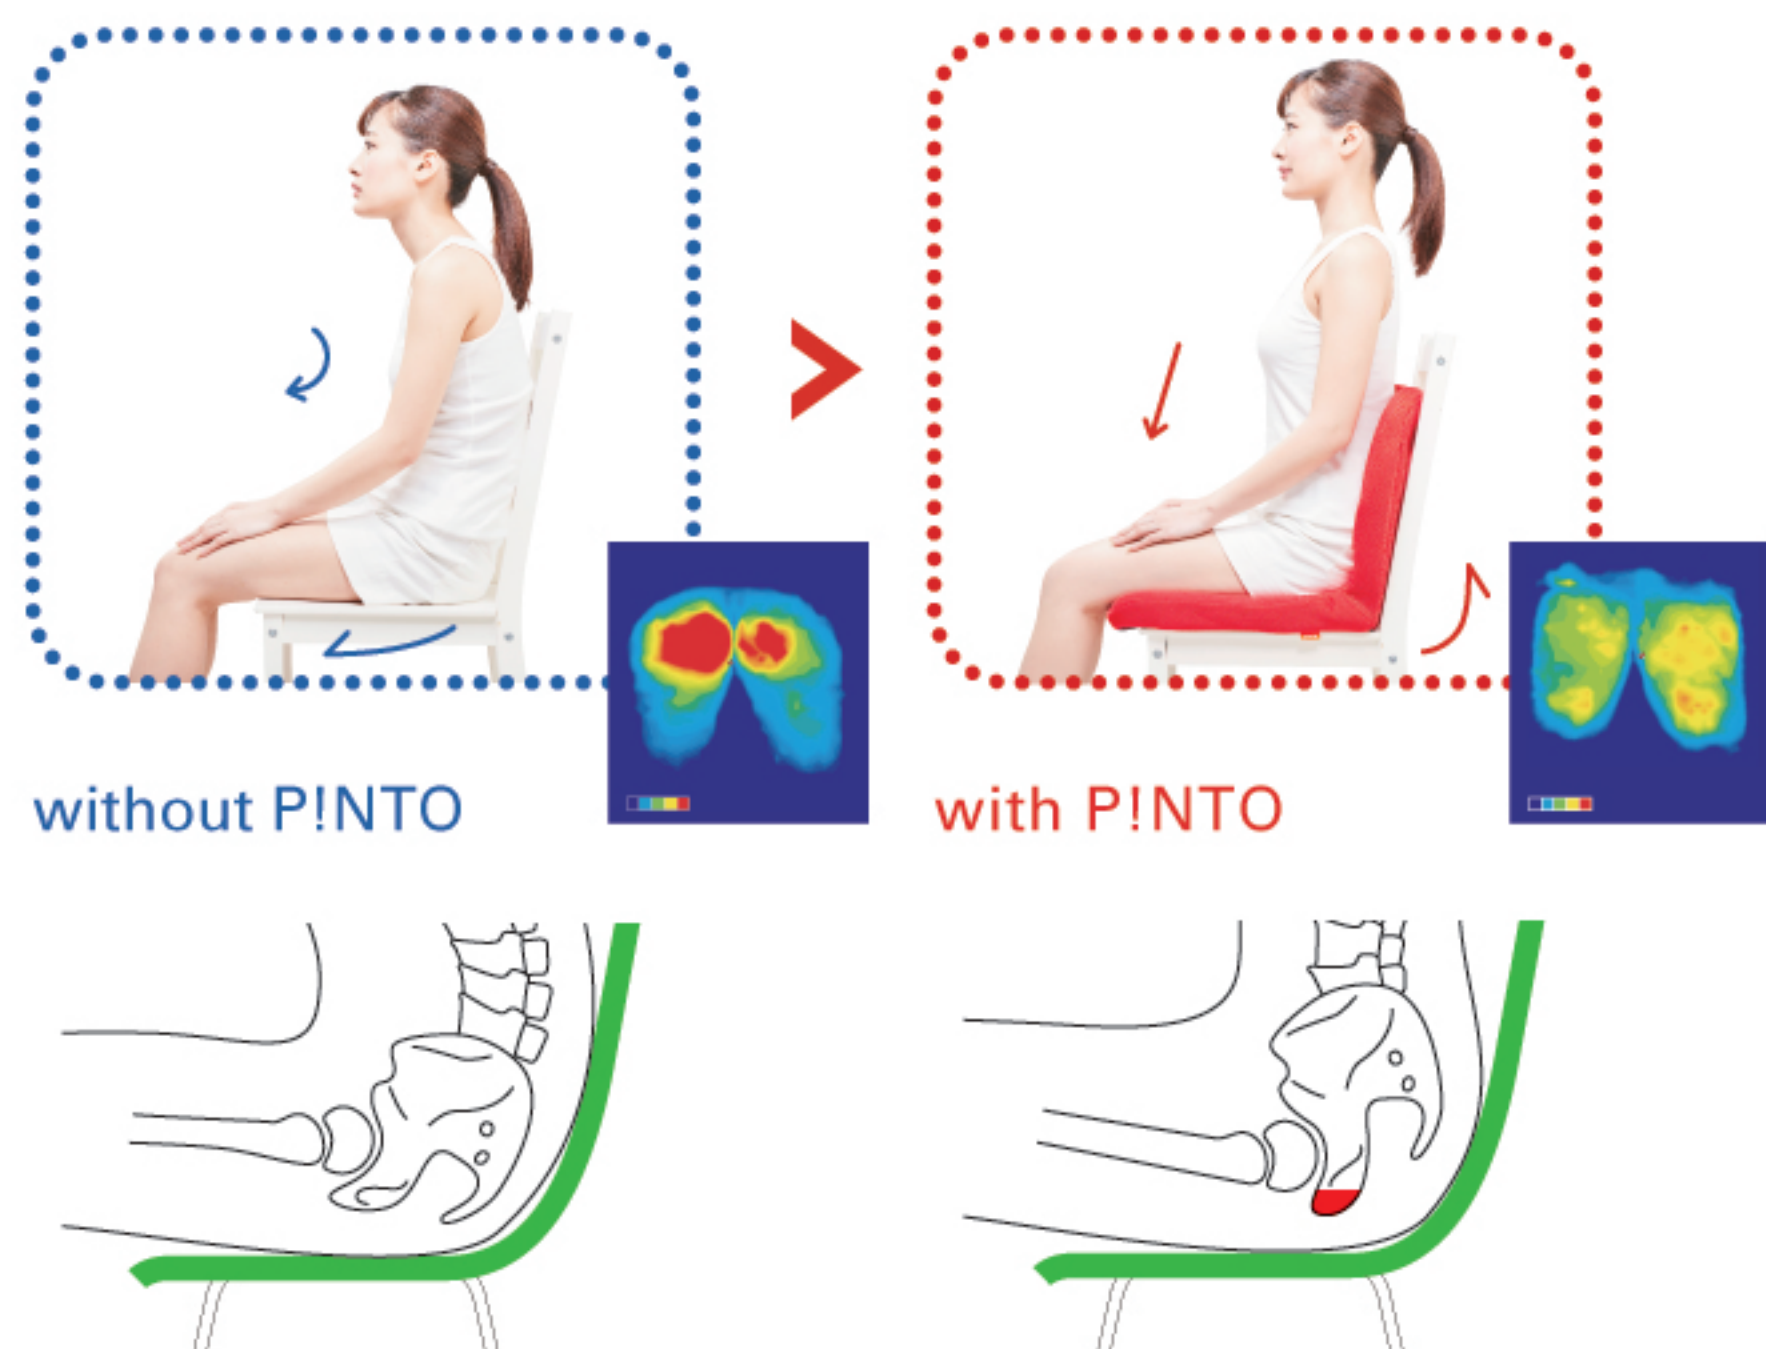

P!NTO supports the pelvis, which tends to lean backwards and the easily deformed chest, relieves tension in the muscles of the back and shoulders, and removes all fatigue.

P!NTO offers good postural habits, as well as natural and balanced comfort. It can be used on a chair with backrest. At work, in the dining room, on the couch, and even on the train.

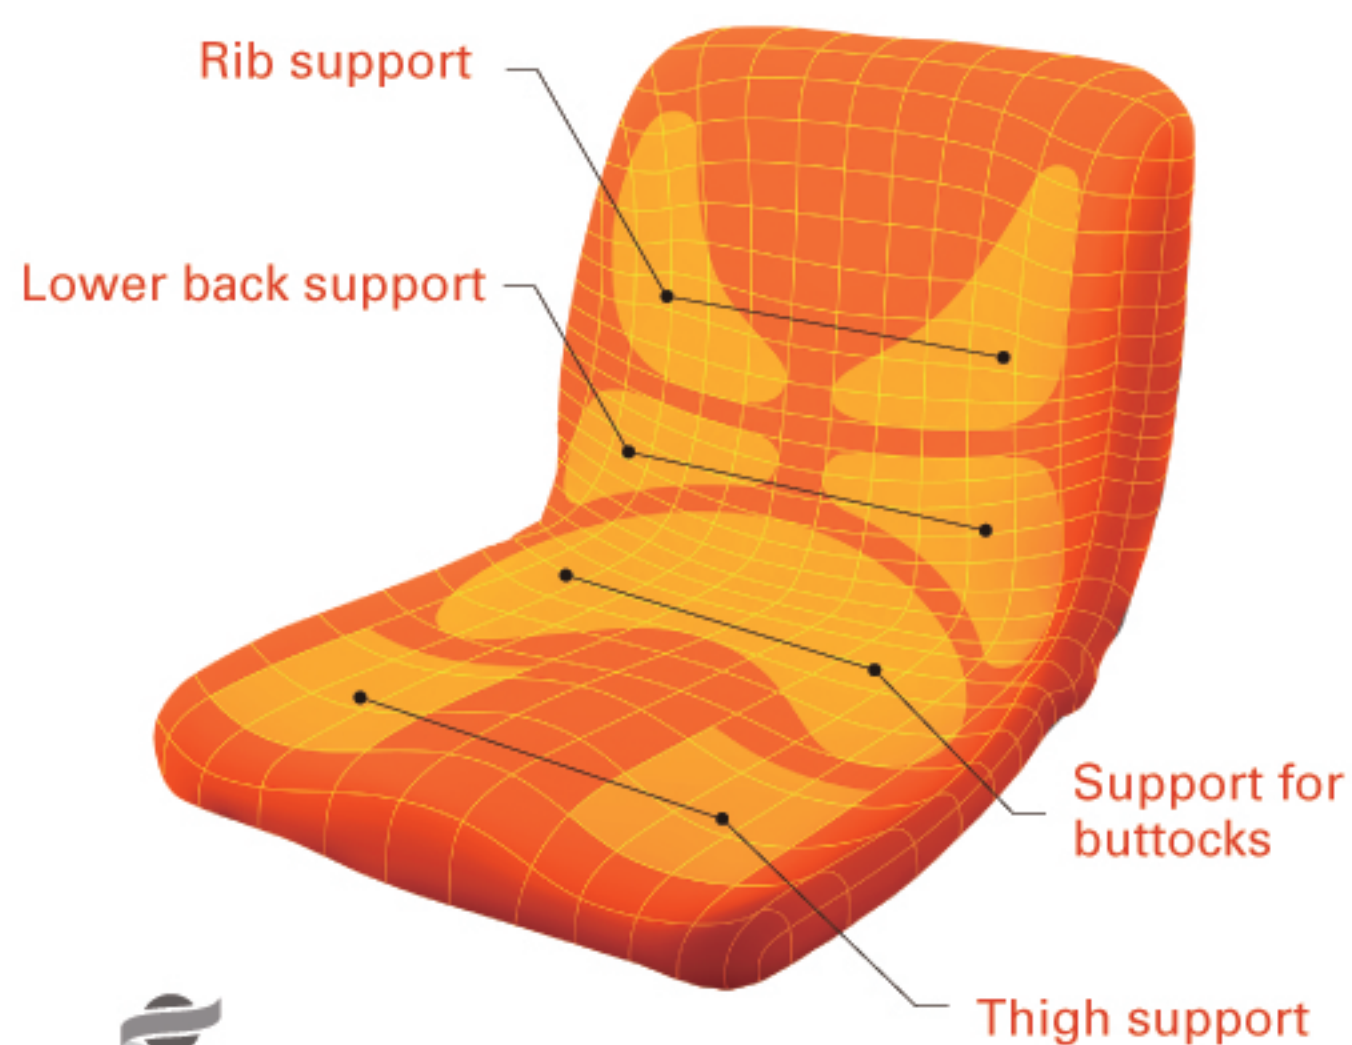

Designed in Japan, Production in Japan and Italy, Distribution from Italy.

Comparison of the zones of tension according to the posture

4 ideal integrated supports

P!NTO is a Japanese brand, developed by occupational therapist HISAKO NOMURA who discovered that the benefits of sitting in a neutral posture are superior to those of rehabilitation exercises. It is the first brand in the world specialized in ergonomic seats made with the ETHREEM® three-dimensional spatial structure technique that supports the body with 4 support points. The pressure on the thighs and buttocks is distributed and balanced, stress and muscle tension are eliminated. Even with the movement, P!NTO helps you get back into alignment. Having the right posture gives you energy for an active life.

In 2017, 50,000 pieces were sold. P!NTO is used in public schools and at the National Assembly in Japan.

Technical characteristics:

Cushion Material: High Resilience HR Polyurethane Foam

Cover: 100% Polyester

Dimensions, Weight: width 43cm x height 38cm x depth 43cm, 900g

Resistance: tested according to the JIS standard (Japanese Industrial Standard), thickness loss of only 4% after 80000 compressions

Maintenance: Cover can be removed and machine washed inside a protection net. The inner cushion does not require special maintenance.

Portable: a light and foldable polyurethane cushion can be transported easily

Use: thanks to the anti slip finish of the bottom side the cushion stays firm even when you move

Established in 2013, 180,000 sales in 5 years in Japan.
