

MARSHMALLOW

Pouf - Japanese ergonomic stool

Line-ups

Seat with minimal and innovative shapes

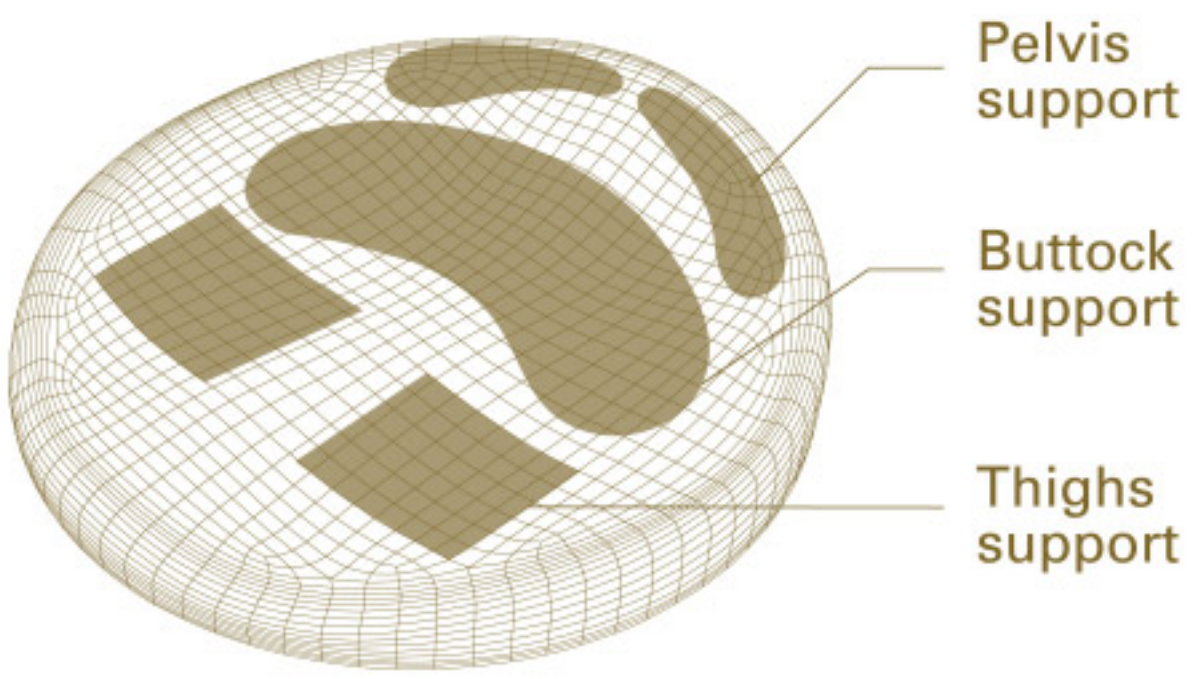

The "Pouf MARSHMALLOW" represents the ability to adapt to any possible space in the variegated world of contemporary design.

This small object was born from the collaboration between the occupational therapist HISAKO NOMURA and Italian architect SIMONE MICHELI: with its ergonomic geometry it translates the complexity of seating in simplicity and comfort.

Designed in Japan and Italy, Production in Italy, Distribution from Italy.

ideal integrated supports

P!NTO is a Japanese brand, developed by occupational therapist HISAKO NOMURA, who discovered that the benefits of sitting in a neutral posture are superior to those of rehabilitation exercises. It is the first brand in the world specialized in ergonomic seats made with the ETHREEM® three-dimensional spatial structure technique that supports the body with 3 points of support. The pressure on the thighs and buttocks is distributed and balanced, stress and muscle tension are reduced. Even after moving, P!NTO helps you get back into alignment.
